## SOLUTION FOR ASME 17.1 REQUIREMENTS FOR TRACTION (ELECTRIC) ELEVATORS

Boesch Traction Sentinel simplifies the pumping solution while ensuring the correct components are specified to meet application and code requirements for traction ( electric ) elevators for ASME 17.1 Safety Standard.

This package approach, inspired by the industry's acceptance of the Boesch Oil Sentinel<sup>®</sup> in hydraulic elevators—maximizes operational efficiencies from specification to installation.

Designing a plug-and-play, application-specific answer to pumps and associated equipment in traction ( electric ) elevators has led to the following features:

- Boesch BC/BN series pumps, featuring a vortex impeller design, have become the standard for elevator applications.
- NEMA 4X control panel with HOA switch, pump run light and a dry contacts for remote monitoring connectivity
  - Three N.O. externally weighted floats (on, off and high water) are included.
  - Ability to further customize with control panel features, main disconnect and/or junction box with 8-pin connector

Simplex control panels will control a 120/208/240V single phase or a 208/240/480V three phase pump in sewage pump chambers, sump pump basins, and lift stations. Simplex control panels come standard with a clear front NEMA 4X rated enclosure, an IEC rated contactor, and a motor protective switch.

## Features

- Pump control visible indicators: Pump hand-off-auto (H.O.A.) switch, green Pump Run light, red Pump Fault light with reset button, and Power On light
- Alarm visible indicators: High red beacon alarm light, alarm test and silence buttons
- Alarm horn sounds at 85 decibels at 10 feet
- Remote monitoring by dry contacts: High Liquid, Pump Fault, Pump Run
- Upgraded pump protection: Motor protective switch (branch circuit protection, adjustable overload and disconnect) and a thermal cutout with indicator

## Applications

- Sewage pump chambers
